### 1989 CRESSIDA CONCEALED WIPER OPERATION

The 1989 Cressida wiper arm assembly has two positions:

**CONCEALED, SEMI-CONCEALED**

#### **DESCRIPTION:**

The front wipers may be operated from a fully concealed or a semi-concealed position.

**The semi-concealed position allows for wiper blade replacement, snow accumulation, and to lift the wipers to clean the windshield.**

When changing the wiper arm position from fully concealed to semi-concealed, grasp the joint section between the wiper arm and blade and pull the arm up (along the windshield) in direction **A**. To change to the fully concealed position, move the arm down in direction **B**. From the semi-concealed position, the wipers can be locked back as shown at 1 below.
