### 1989 MAINTENANCE SCHEDULE

Since 1986, the majority of Toyota models have had a uniform 10,000 mile/12 month maintenance schedule making it easier for customers and service personal alike to remember when required maintenance is due.

For 1989 models, the Toyota owner's manual offers 3 maintenance sections within the maintenance chapter as follows:

**(1) GENERAL MAINTENANCE**

This section describes maintenance items which are the owner's responsibility.

**(2) SCHEDULE A**

This schedule is for those Toyota vehicles which may require more frequent maintenance, due to driving conditions, environment, etc. This was formerly known as the "Severe" schedule.

**(3) SCHEDULE B**

This schedule is Toyota's minimum maintenance requirement. Items on this schedule must be performed to maintain Toyota's warranty coverage. This was formerly known as the "Normal" schedule.

A 1989 maintenance schedule "B" chart is provided on page 3 of this bulletin for your convenience and quick reference.

## 1989 MAINTENANCE SCHEDULE (CONT'D)

### SCHEDULE "A" REQUIREMENTS

Several items require more frequent service under certain driving conditions as described in both the Owner's and Repair Manuals. The guidelines for which maintenance schedule to follow, i.e "A" or "B," are shown below and are included in all 1989 Owner's manuals.

#### WHICH SCHEDULE TO FOLLOW?

If you mainly operate your vehicle under one or more of the conditions below:

- Towing a trailer, using a camper or car top carrier
- Operating on dusty, rough, muddy or salt-sprayed roads
- Repeated short trips less than 5 miles (8 km) and outside temperatures remain below freezing
- Extensive idling and/or low speed driving for a long distance such as police, taxi or door-to-door delivery use

Follow  
Schedule  
"A"

If you mainly operate your vehicle under:

CONDITIONS OTHER THAN THOSE LISTED  
ABOVE

Follow  
Schedule  
"B"

For an exact description of each model's maintenance requirements, please refer to the appropriate 1989 owner's or repair manual.
