### 1991 TOYOTA PAINT AND REFINISH FORMULA CODES

Attached is a listing of all applicable paint codes and refinish paint formula codes from available paint manufacturers – BASF, DuPont, PPG Industries, Sherwin Williams, Sikkens, Herberts Standox and Spies–Hecker.

**Please Note:**

- The paint color code is found on the drivers side door or door jamb on the Certification/Regulation label (white vinyl label).
- All colors listed in bold and designated with an “N” are new for 1991. Carryover colors are designated with a “C”.
- Colors listed as Pearl (P) or Metallic (M) have a clearcoat top coat finish.
- Where two (2) formula numbers are listed for the same color, the first number is the base coat and the second number is the pearl (mica) coat.
- The following paint manufacturers reference codes are identical to Toyota color codes, however a “TOY” prefix is used. Example: Toyota’s 045 white = “TOY045”.  
BASF/Glasurit, Sikkens, Herberts Standox and Spies–Hecker.

PLEASE CONTACT YOUR LOCAL WAREHOUSE JOBBER OR PAINT MANUFACTURER’S REPRESENTATIVE FOR THE ACTUAL PAINT MIXING FORMULAS OR FOR ADDITIONAL ASSISTANCE.
