1992 PAINT & REFINISH FORMULA CODES

Page 1 of 5

The following is a listing of 1992 Toyota paint codes and corresponding refinish formula codes for refinish paint companies — Sherwin Williams, BASF, Du Pont, Spies-Hecker, Sikkens and Herbets Standox.

NOTE:

- The paint color code is found on the driver's-side door or door jam on the Certification/Regulation label (white vinyl label).
- Colors listed as Pearl (P) or Metallic (M) have a clearcoat top coat finish.
- Where two (2) formula numbers are listed for the same color, the first number is the base coat and the second number is the pearl (mica) coat.
- The following paint manufacturer's reference codes are identical to Toyota color codes, however a "TOY" prefix is used. Example: Toyota's 045 White = "TOY045".
 - Sikkens
 - Herbets Standox

Please contact your local warehouse jobber or paint manufacturer's representative for the actual paint mixing formulas or for additional assistance.
