1993 PAINT & REFINISH FORMULA CODES

Page 1 of 3

The following is a listing of 1993 Toyota paint codes and corresponding refinish formula codes from refinish paint companies – Sherwin Williams, BASF, Du Pont, PPG, Spies Hecker, Sikkens and Herberts Standox.

NOTE:

- The paint color code is found on the driver's side door or door jam on the Certification/Regulation label (white vinyl label).
- Colors listed as Pearl (P) or Metallic (M) have a clearcoat top coat finish.
- Where two (2) formula numbers are listed for the same color, the first number is the base coat and the second number is the pearl (mica) coat.
- The following paint manufacturer's reference codes are identical to Toyota color codes, however, a "TOY" prefix is used. Example: Toyota's 045 White="TOY045."
 - Sikkens
 - Herberts Standox

Please contact your local warehouse jobber or paint manufacturer's representative for the actual paint mixing formulas or for additional assistance.

1993 PAINT & REFINISH FORMULA CODES

CODE	COLOR NAME	SHERWIN WILLIAMS	BASF	DUPONT	PPG	SPIES-H	SIKKENS
