

BACK DOOR WINDOW REGULATOR RUST

To improve anti-rust performance of the back door window assembly (with rear window defogger), the shapes of the back door glass outer weather-strip and channel filler have been changed and a regulator cover has been added.

NOTE: Installation of the screw identified by an * can be simplified by pushing down on the regulator cover (near the threaded screw hole) during installation.

BACK DOOR WINDOW REGULATOR RUST

PRODUCTION EFFECTIVE:

Affected models have a rear window defogger
